Note: The products depicted in this brochure may vary to some degree in product graphics or color.

It used to be that motorcyclists didn't wear helmets – with tragic consequences. Seat belts in cars? It seems strange now, but they only became mandatory for the first time in 1970. Likewise, the neck brace is the most recent safety innovation that will soon become simple common sense. Leatt-Brace®s are lab-designed to fit most riders: young or old, amateur or professional. Comfortable and adjustable, but most importantly, they're built and tested to help lessen the risk of injury in your sport. It's just that simple.

Why choose Leatt®

CE certified: Personal Protective Equipment
directive 89/686/EEC

Two red-colored release clips identify emergency openings to paramedics.

All materials have been chemically tested and certified, so it's free of lead or other harmful additives.

A unique cut out-section help the brace and helmet avoid contact with the collarbone.

The Leatt-Brace® includes an engineered fracture point in the Thoracic strut. In an emergency, this replacable part is designed to snap.

The rear-upper support acts as a 'crumple-zone', giving way under a severe load.

Maximum adjustability is achieved through six independent adjustment points.

Padding is biomechanically designed to cushion the chin.

Universal bolt heads require a single adjustment wrench, and are also compatible with multi-tools.

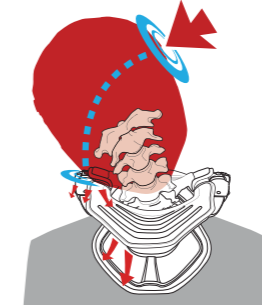

The thoracic member is engineered to keep the brace in position, so it doesn't tilt forward or backwards during an impact.

The Leatt-Brace® is made using only high quality materials like Kevlar®, Carbon, Fiberglass reinforced polyamide resin, and shock-absorbing Biofoam. (Biofoam is also fully replaceable and machine-washable.)

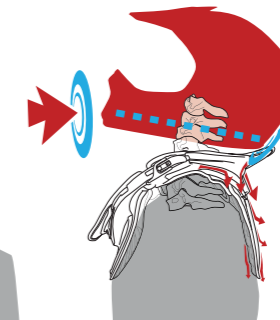

The Leatt-Brace® helps protect against:

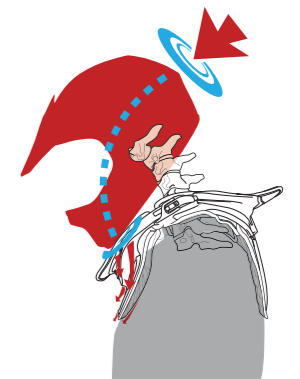

Hyperextension:
over-bending of the head in rearward direction.

Lateral Hyperflexion:
over-bending of the head to one side.

Posterior Hypertranslation:
extreme movement of head and helmet, rearward on the neck.

Hyperflexion:
over-bending of the head in forward direction.

Axial Loading:
The brace helps prevent axial loading when the axial forces act in combination with bending movements or shear forces. As an example this typically occurs when your head is forced forward (hyperflexion) or forced backwards (hyperextension).

GPX Pro

The Leatt® Pro neck brace is the pinnacle in neck brace technology! The Pro brace features a fully ventilated carbon-fiber chassis with completely redesigned, open-cell padding. The Pro brace is the lightest, most ventilated and most comfortable brace we have ever designed and, like all Leatt-Braces®, is built around Alternative Load Path Technology™ to give you the confidence needed to compete at the top of your sport!

- The lightest Leatt-Brace® available 550g ± 50g!
- Kevlar reinforced Carbon Fiber Matrix chassis
- Anodized CNC spring loaded aluminium hinges are easy to use for both left- and right handers. Its bright red colour ensures easy identification by paramedical personnel in an emergency situation.
- Alternative Load Path Technology™
- New open celled light weight Velcro-free padding is removable & washable.
- Engineered Collarbone cutout to help keep your helmet and brace away from one of your most fragile bones.
- Unique one piece rear support (thoracic) designed to break away in severe impact scenarios.
- The greatest range of motion of any Leatt-Brace®
- Comes with harness system with quick-release buckles.
- On-board rear thoracic angle adjustment.
- Adjustable sizing to fit riders according to Leatt® size chart. Available in size #M
- Replacement parts available
- Free Brace Bag included (€100 value)
- Leatt® GPX Pro will be available in December 2010

STX Road

Leatt® STX Road, the all-new neck brace for street motorcycle riders. Built around a fibreglass reinforced polyamide resin frame, designed with Leatt®'s Alternative Load Path Technology™, the Leatt® STX Road features seamless integration of function, movement and looks for street motorcycle riding on the road or at the race track.

The STX Road accommodates on-board size fitting for easy, no-tool size adjustments for use with or without various riding garments. Street Thoracic designed to accommodate an aero hump and various types of body armour, also folds for easy storage. Specifically designed to give generous movement of your helmet for the over-the-shoulder view.

- Optimal street riding position
- No-tool size adjustment
- Unique Street Thoracic designed to accommodate an aero hump.
- Street Thoracic foldable for easy storage
- Security feature allows brace to be safely locked to motorcycle.
- Integrated padding accommodates movement for over-the-shoulder views.
- Rubber-coated front tip helps prevent motorcycle body scratches.
- Jacket zipper relief
- Adjustable sizing to fit most riders
Available in size #S/M, #L/XL and #XXL
- Leatt® STX Road will be available in early 2011

Adventure Chest Protectors

The first question riders ask us after the purchase a Leatt-Brace® is "What chest protector works best with the brace?" There have been several "good" choices from other manufacturers, but never a "great" one. Until now. Exclusive BraceOn elastic strap system attaches the protector to the Leatt-Brace® yet provides independent movement of body, brace and chest protector. A critical need for championship level riding!

- CE approved to EN 14021 on Adventure
- CE approved EN 14021 front and EN 1621-2 level 2 highest CE approval back protector using SaS-TeC development on Adventure Pro
- Close fitting allows for over or under the jersey use
- Made of extremely tough HDPE and washable Biofoam
- Front and rear removable plates allow brace to fit close to body, as it should
- Adjustable arm and chest straps for great fit
- Removable shoulder and upper arm guards
- Fits riders from approx. 50-100kg

Join our Facebook group and let us know what you think. We'd love to hear from you! The Leatt® Team

ALPT CERTIFIED

Find the Leatt-Brace® for you. Choose your discipline.

MX

Why Leatt

Leatt® is a sign of commitment, passion and dedication. It shows the world that you're serious about your sport and, when it comes to safety, you don't accept half-measures. It's a badge of honour. A choice.

Years of the same commitment, passion and dedication went into the development of the revolutionary Leatt-Brace® and continues with every new product being developed at Leatt®. Backed by scientific research and the collaboration with highly esteemed players in the safety field, all our products benefit from these continuous efforts by Dr. Leatt and his team of designers and biomedical engineers at the Leatt® Lab in Cape Town, South Africa, home of Leatt®'s research & development. It is our badge of honour. Our choice.

Leatt Twitter Feed

we've got a brand new website! www.leatt-brace.com. Check it out and let us know what you think #leatt #leattbraces

Check out Leatt's Chief Designer Mark Hopkins giving a run down of the new DBX braces & chest protectors. <http://vimeo.com/14701195> 11:08 AM Sep 5th

Incredible wind for Leatt riders! 4 World Champs! Marvin Musquin MX2, Sam Hill DH MTB, Caroline Buchanan 4X & Mats Nilsson MXGP veterans! 3:36 PM Sep 5th

Big congrats to Leatt Ambassador & Dakar Rally legend Cyril Despres & girlfriend Lala on their first-born, Gina. <http://tinyurl.com/34n5kx> 12:51 PM Aug 28th
