F+ #KING HARSH.

Keep it that way cause we've got two ways to keep you rolling through the most damaging terrain out there. Our Sand Goggle fitted Klutch's feature tinted lenses and closed cell foam. Sand never stood a chance. For those into the long haul, the Enduro Series Alloy's feature posted dual lenses to keep you going through the thick and thin.

TECHNOLOGY

LENS

Our moto goggle lenses incorporate specific elements to achieve the highest level of clarity. Each lens is scratch resistant for ultimate durability. To keep your vision clear in tough conditions, our moto lenses are made with built-in posts that work with our tear-offs. Mud never saw this coming.

TRIPLE LAYER ISOTRON™ FACE FOAM

The most comfortable face foam on the planet, hands down. Our Isotron™ foam is made of three different densities, each one adding to the comfort and functionality of your goggles. The topmost layer features SPY+'s moisture-wicking Dri Force™ fleece; super-soft and comfortable, this fleece wicks the sweat away from your face and out through the foam. All day comfort and crystal clear views courtesy of Isotron™.

SCOOP® VENTILATION

Goodbye fog. Our patented Scoop® venting system eliminates lens fogging by promoting airflow behind the lens. The Scoop® system forces air through strategically placed vents of varying aperture on the goggle frame to shut down fog. Your vision will thank you.

SCOOP® TECHNOLOGY IS PATENTED BY SPY OPTIC, U.S. PATENTS: 5,610,668; 5,898,468; 5,801,805; 6,050,684; D470,882 S. OTHER DOMESTIC AND FOREIGN PATENTS PENDING.

SWEAT ABSORPTION SYSTEM® (SAS)

Eliminate sweat with 600% more sweat absorption power than ordinary face foam! This removable, replaceable foam accessory allows you to ride longer and stay drier. Caution, use of our SAS® system may lead to increased ride time and more radness than you can handle.

SILICONE RIBBING

Designed to keep your goggles fixed firmly on your helmet, this thin strip of silicone goes the distance. Take your best shot! Our goggle straps stay on even if you don't.

AVAILABLE PHOTOCROMIC LENSES

Lenses engineered to adjust to nearly any light condition—as the sun gets brighter, your lenses get darker, and vice versa. Active molecules are cast into the lens material for quick activation times, extended life, and durability. Ride from daybreak to nightfall with style and ease.
